DETAILED ACTION

1. Applicant's arguments filed on 17 September 2004 with respect to claims 1-15 are persuasive. Therefore, the rejection of claims 1-15 under 35 U.S.C. 103(a) is being now withdrawn.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Ruthleen E. Uy (Reg. No. 51,361) on March 15, 2005.

In the claim

The application has been amended as follow:

Claim 1, line 1, change "A contents retrieval system comprising:" to - - A contents retrieval computer-implemented system comprising: - -.

REASONS FOR ALLOWANCE

3. Claims 1-15 are allowed over the prior art of record.

The following is an examiner's statement of reasons for allowance:

With respect to claim 1, the claimed features "retrieval request receiving means for receiving a retrieval request of contents on a communication network from a user accessing through communication network, and contents retrieval means for retrieving the contents on the communication network in accordance with the processing conditions registered with said retrieval management table and storing the retrieval result" in combination with other element of the independent claims would not found anticipated or obvious over the prior art made of record. With respect to claim 4, the claimed features "a contents retrieval program storage medium storing a contents retrieval program for forming a contents retrieval system on a computer system, said contents retrieval system comprising: retrieval request receiving means for receiving a retrieval request of contents on a communication network from a user accessing through communication network, and contents retrieval means for retrieving the contents on the communication network in accordance with the processing conditions registered with said retrieval management table and storing the retrieval result" in combination with other element of the independent claims would not found anticipated or obvious over the prior art made of record.

The dependent claims, being definite, further limiting, and fully enabled by the specification are also allowed.

The closest prior art, U.S. Patent No. 6,275,825 issued to Kobayashi et al., relates to a data access control apparatus for limiting data access in accordance with user attributes. U.S. Patent No. 5,694,595 issued to Jacobs et al., relates to a method and system for administering user profiles on remote machines in a distributed database environment but fail to teach the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
